DesignaKnit7

DesignaKnit 7 is a powerful CAD/CAM program for designing knitwear.

The program offers:

- **Standard Garment Styler** – a versatile pattern-drafting tool to create garments from a range of standard shapes
- standard sizes for men, women, children and babies
- edit any or all of the body measurements and ease to obtain a perfect fit
- a database to record personal size data

- **Original Pattern Drafting** – to design garments from scratch
- display all the garment pieces; experiment with layout and orientation; cut pieces into separate panels; join panels into one piece
- add curves
- display a grid in the chosen unit of measurement or in stitches and rows for exact stitch layout
- measure around any section and across any piece

- **Stitch Designer** – gives the ability to design multi-coloured and textured stitch patterns and to integrate these with garment shapes
- full support for colour-changers
- using a graphics tablet, trace directly into the program
- use any True Type TM font to place text on your design

*DesignaKnit 7 comes in **Professional** and **Standard** versions*

*The **Standard** version does not include the **Original Pattern Drafting** section*

*The **Professional** version is the full-featured program allowing greater freedom of creativity and a greater degree of control over the design process*

DesignaKnit 7 has the following minimum requirements:

- **386, 486 or Pentium IBM-compatible PC**
- **8 Mb RAM** (16 Mb recommended)
- **256 (or higher) colour SVGA display** (the program will run in 16 colour VGA mode, but the colours may appear dithered)
- **Windows 3.x, 9.x, NT4, ME, W2K, XP, Vista or 7** (except 64 bit versions)
- **Mouse or other pointing device**

DesignaKnit Cable Links
Cable links are available for **Brother, Silver Reed and Pfaff/Passap Electronic Knitting Machines** and for the **Brother PPD and Silver Reed PE1**; the **ScreenLink Cable** may be used for Interactive Knitting with any punch card or manual knitting machine.

- *automatic separation of colours for Jacquard knitting*
- *wide choice of charts and templates to print*
- *using the appropriate cable link, download stitch patterns to electronic knitting machines*
- ***DesignaKnit Graphics Studio*** – provides all the facilities for importing images from scanners, graphics programs, digital cameras, internet, etc
- *specify or exact number of stitches and rows for converting the image to a stitch pattern*
- *have complete control when converting image colours to yarn colours*
- *create the effect of using many colours in a row by automatic use of birdseye to produce blends of just a few of the original colours*
- ***Interactive Knitting***, the ultimate shaping and pattern control tool: link any machine to the computer via the appropriate link to follow row by row all the instructions for colour changing and shaping.

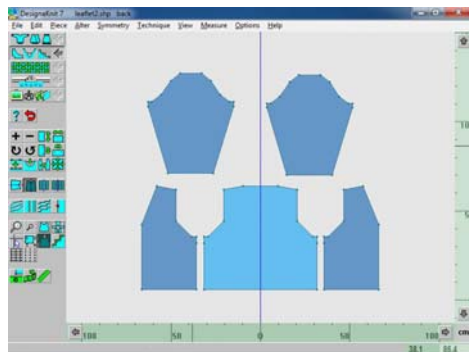

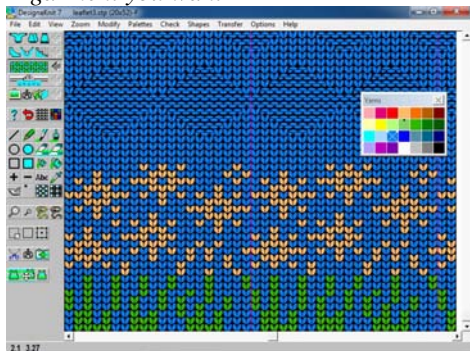

Standard Garment Styling

- Choose from a built-in range of garment shapes and select a neckline and sleeve type
- Use standard measurements or enter your own for a perfect fit
- Alter styling features and ease

Original Pattern Drafting

- Start a pattern block from scratch or adapt a standard garment for an entirely original design
- Use a host of drafting tools to shape the garment you want

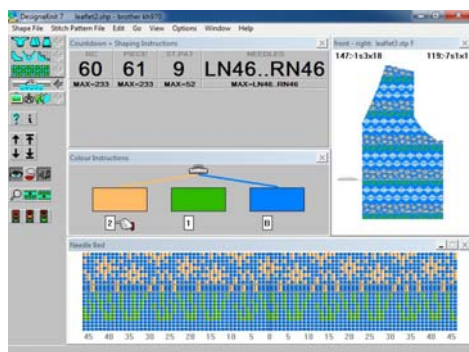

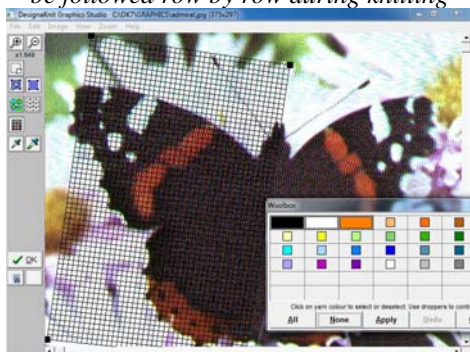

Stitch Designer

- Design multi-coloured and/or textured stitch patterns
- Download to a knitting machine
- Print punch or reader card templates
- Use a range of paint tools to create different effects

Interactive Knitting

- All types of knitting machines, even non-electronics, can be linked to the PC so that colour changing and shaping instructions can be followed row by row during knitting

Graphics Studio

- Import images from other sources
- Control exactly how image colours are converted into yarn colours.
